

## Micro Focus UFT One Frameworks and Best Practices An Orasi Training Course

### Course Overview

Does your organization have an automated testing strategy or framework to help decrease script creation and maintenance costs? Micro Focus's automated functional testing software Micro Focus UFT One can utilize automation frameworks that facilitate high script reusability, dynamic objects, and low script maintenance. With many different framework methodologies to choose from, which one is best for your organization?

Orasi™ Software, Inc. delivers a hands-on Micro Focus UFT One workshop to help organizations answer this question and more. Micro Focus UFT One Frameworks and Best Practices Workshop is a training opportunity for Micro Focus UFT One automation engineers who are looking for guidance on how to build an effective and efficient automation framework and is presented through lecture and an interactive workshop.

**Duration:** 3 days

**Class Limit:** 10 students

**Labs:** 70% of class time

**Prerequisite:** Micro Focus UFT One GUI End User Training and/or Micro Focus UFT One API End User Training or equivalent

#### Target Audience

- Automation Engineers

#### Related Classes

- Micro Focus UFT One GUI End User Training
- Micro Focus UFT One API End User Training

### Goals

- Understand the different automation framework methodologies
- Properly plan and set up the foundation of an automation framework
- Develop an automation framework maintenance plan

### Agenda

- Automation frameworks overview
- Orasi Micro Focus UFT One coding best practices
- Integrating Micro Focus UFT One GUI and API tests
- Micro Focus UFT One workshop
  - Choosing a framework methodology
  - Framework planning
  - Framework setup
  - Framework script component creation

### Objectives:

This class teaches:

- The challenges and benefits of different automation framework methodologies
- How to choose the right framework methodology for your application
- Micro Focus UFT One VBScript and C# coding best practices
- How to plan and set up an automation framework
